LEGLE

CRYSTAL

Crafted with Skills

The history of legle crystal glass can be traced back to 570 years ago, when its products first appeared in the bavarian forest of germany. Legle continued to use the best quartz sand in europe, which is located between bavaria and the czech republic - the quartz sand of hirschau-schnaittenbach, to manufacture its high-quality crystal glass. It is this unique quartz sand that gives legle crystal glass its optical quality and exceptional glass quality.
